

## Innovative Teaching Practices

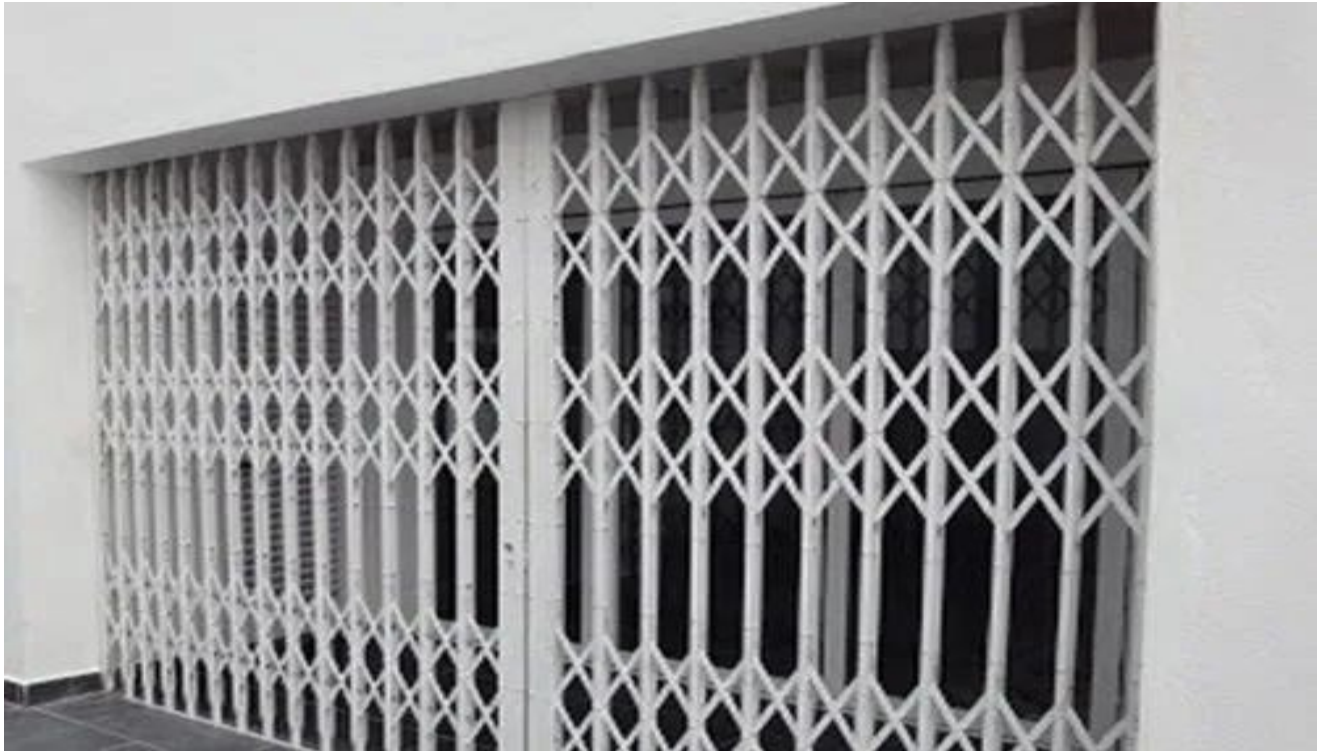

**Course teacher:** N. S. Khan

**Course name:** Planning and Design of Public Building

Innovation in teaching through model of **collapsible door**.

The collapsible door gives high-level security and also provides ventilation and vision. Even when the doors are closed, communication is possible. This door may be made of single or double shutters. It is a popular choice for the protection of domestic windows and patio doors. The collapsible door is used for the main entrance of the residential building, shops, godowns, etc. having large size openings. It occupies less space, particularly for the opening.

#### **Advantages of Collapsible Door:**

- It is easy to use and reliable.
- The collapsible door gives you 100% opening.
- It is easy to handle.
- It is a highly visual deterrent to potential intruders.
- These doors are custom made.
- A single door can be used for easy access without having to open the whole door.
- It is cost effective.
- It can be opened as desired.
- They are light in weight as compared to solid doors.
- It can be controlled easily as it can be operated with chain or lock.
